Detail About Issue: If your website contains any elements that are not secured with HTTPS, this may lead to security issues. Moreover, browsers will warn users about loading unsecure content, and this may negatively affect user experience and reduce their confidence in your website.

Recommendation: Only embed HTTPS content on HTTPS pages. Replace all HTTP links with the new HTTPS versions. If there are any external links leading to a page that has no HTTPS version, remove those links.

4. Duplicate Content Issue

2 pages have duplicate content issues

| Page URL | Similar pages |
|---|---|
| https://www.lovepicnicparis.com/category/versailles-picnic/ | https://www.lovepicnicparis.com/tag/versailles-picnic/ |
| https://www.lovepicnicparis.com/tag/versailles-picnic/ | https://www.lovepicnicparis.com/category/versailles-picnic/ |

Detail About Issue: Webpages are considered duplicates if their content is 85% identical. Having duplicate content may significantly affect your SEO performance.

Recommendations: -

- Provide some unique content on the webpage.
- Add a rel="canonical" link to one of your duplicate pages to inform search engines which page to show in search results
- Use a 301 redirect from a duplicate page to the original one
- Use a rel="next" and a rel="prev" link attribute to fix pagination duplicates
- Instruct GoogleBot to handle URL parameters differently using Google Search Console

Detail About Issue: Alt attributes within tags are used by search engines to understand the contents of your images. If you neglect alt attributes, you may miss the chance to get a better placement in search results because alt attributes allow you to rank in image search results.

Not using alt attributes also negatively affects the experience of visually impaired users and those who have disabled images in their browsers.

Recommendation: Specify a relevant alternative attribute inside an tag for each image on your website.

Detail About Issue: Our crawler reports pages that have duplicate title tags only if they are exact matches.

Duplicate <title> tags make it difficult for search engines to determine which of a website's pages is relevant for a specific search query, and which one should be prioritized in search results. Pages with duplicate titles have a lower chance of ranking well and are at risk of being banned. Moreover, identical <title> tags confuse users as to which webpage they should follow.

Recommendation: Provide a unique and concise title for each of pages that contains your most important keywords.

Detail About Issue: Though meta descriptions don't have a direct influence on rankings, they are used by search engines to display your page's description in search results. A good description helps users know what your page is about and encourages them to click on it. If your page's meta description tag is missing, search engines will usually display its first sentence, which may be irrelevant and unappealing to users.

Recommendation: In order to gain a higher click-through rate, one should ensure that all of your webpages have meta descriptions that contain relevant keywords.

Detail About Issue: h1 headings still help define your page's topic for search engines and users. If an <h1> tag is empty or missing, search engines may place your page lower than they would otherwise. Besides, a lack of an <h1> tag breaks your page's heading hierarchy, which is not SEO friendly.

Recommendation: Provide a concise, relevant h1 heading for each of your page.

| Page URL | Page Count |
|---|------------|
| https://www.lovepicnicparis.com/about/ | 185 |

Detail About Issue: This issue is triggered if the number of words on your webpage is less than 200. The amount of text placed on your webpage is a quality signal to search engines.

Recommendation: Improve your on-page content and be sure to include more than 200 meaningful words.

Detail About Issue: Your text to HTML ratio indicates the amount of actual text you have on your webpage compared to the amount of code. This issue is triggered when your text to HTML is 10% or less.

Search engines have begun focusing on pages that contain more content. That's why a higher text to HTML ratio means your page has a better chance of getting a good position in search results. Less code increases your page's load speed and also helps your rankings. It also helps search engine robots crawl your website faster.

Recommendation : Split your webpage's text content and code into separate files and compare their size. If the size of your code file exceeds the size of the text file, review your page's HTML code and consider optimizing its structure and removing embedded scripts and styles.

Detail About Issue: A nofollow attribute is an element in an <a> tag that tells crawlers not to follow the link. "Nofollow" links don't pass any link juice or anchor texts to referred webpages.

Recommendation : Make sure you haven't used nofollow attributes by mistake. Remove them from <a> tags, if needed.

19. Mobile Speed

Diagnose performance issues

Detail About Issue : The slow loading speed of our website poses a significant issue, as it directly impacts user experience and engagement. Studies show that users are likely to abandon a webpage if it takes more than a few seconds to load, leading to decreased traffic and potentially lower conversion rates.
